

Open the Wi-Fi networks Window (from Home Screen select **Settings > WiFi**) and select eduroam from the list of networks.

You will be prompted for your credentials – this will be your Student Gateway/Timetable login name. You need to add **@metfilmschool.ac.uk** to the login name to identify your account as belonging to MetFilm School.

You will then be prompted to trust the DigiCert Certificate to connect to Eduroam.

If you are having trouble connecting or have recently changed your account password, you can try the following before connecting to eduroam.

- From the Home Screen select Settings > WiFi
- Select the “I” icon next to the Eduroam network to display the configuration.
- Tap the Forget This Network option at the top of the screen and select Forget when prompted.
- Try Connecting to Eduroam again
