Open the Wi-Fi networks Window (from Home Screen select **Settings > WiFi**) and select eduroam from the list of networks.

You will be prompted for your credentials – this will be your Student Gateway/Timetable login name. You need to add **@metfilmschool.ac.uk** to the login name to identify your account as belonging to MetFilm School.

You can choose to remember the network which will save the credentials in the keychain on the device and will not prompt you to enter them again. This is not recommended for loan and shared devices.

You will then be prompted to trust the DigiCert Certificate to connect to Eduroam.

You may need to add enter your password to accept the certificate and click the Update Settings to connect
